

## Installation Kit

### The Installation kit comes in four different sizes:

All kits contains: boundary cable, biodegradable (Bio) pegs and connectors.

- **Small:** 150 meter cable, 300 bio pegs, 5 gel connectors, 5 docking station connectors.
- **Medium:** 250 meter cable, 400 bio pegs, 5 gel connectors, 5 docking station connectors.
- **Large:** 400 meter cable, 600 bio pegs, 5 gel connectors, 5 docking station connectors.
- **X-Large:** 500 meter cable, 800 bio pegs, 5 gel connectors, 5 docking station connectors.

AM Robots Installation kit, works for all brands - no matter the model.

## How to do an installation.

!!You should always be following your brands guidance on how to do an installation!!

Auto-Mow offers help for your installation by including the ruler.

Place the ruler from the edge of the obstacle and it will give you a guideline for the optimal distance in which to lay down the cable.

Please note that this is however only a guidance, and might vary from model to model. Remember to check the guidance from the manufacture before proceeding.

## Installation Videos for the most common brands:

Underneath you will find some guidance videos for the main brand in the market, just use the QR code below:

Husqvarna

Gardena Sileno

Robomow

Worx

STIHL

Ambrogio

Remember to save the remaining cable, if you need to prolong the boundary area, or if you wish to addon any boundary islands for the garden later on.

Thanks for choosing AM Robots Installation kit!
